Mr Chapin,

It's seem's that there is no need to continue surveillance and maintenance of the Buildings. So our main focus should be Cost Analysis, Trying to minimize the spending of what Federal dollar's we have available. But using those Federal dollar's (targeting) Small Business that are available and able to hire these type of specialized labor's.

This will give a boost to the economy of the tri cities which is weak in a lot of area's, We need a economic rebound and boost. This will send a Beautiful message to our Community & Small Business that our focus is rebuilding and growing. My vote is 3) decontamination deactivation, decommissioning and demolition of buildings and structures and cleanups of

debris. Thank you our chap'in for  
your time reading my comment's.
